

RD121S2 Remote Display

- 12,1" TFT display
- Single cable installation
- Large viewing angle
- 800 x 600 resolution
- -30 ... +80 °C temperature area

RD121S2 is a 12,7 inches TFT-display and is designed to be used with MIC1100S. One cable installation allows screen position freely and optimal place for operator. Screen is designed for harsh environment and wide temperature range.

Screen can be configured to show video feed from cameras connected to MIC1100S.

Technical Information

- 12.1" high quality TFT Touch colour display
- 800 x 600 resolution
- 450 cd/m² brightness
- 80° viewing angle
- -30...+80 °C operating temperature range
- IP67 aluminium housing
- Main dimensions 301(w) mm x 237(h) mm x 48 mm(d)
- Weight 2,7 kg
- Standard VESA 75 mounting

Connectors & Display Cable

- The unit is connected to MIC1100S with standard 4-pin M12 D-coded, male to male cable
- Maximum cable length is 10 m
- Cable fulfilling CAT6 standard is recommended
- Minimum wire size 22 AWG
- Recommended cables:

Dimensions

Mounting

RD121S2 can be mounted using M4 screws from back (VESA75) or with M6 screws from the sides of the backbox.

The preferred mounting position is connectors pointing downwards. If the unit is mounted connectors pointing to the side, then it is vital to leave some loose cable with a downward cue to prevent the ingress of moisture through connector.

Note! Extra care should be paid on grounding of RD121S2. The provided M4 and M6 tapped threads can be for this purpose. It is recommended to use ring tongue and joint compound to minimize transient resistance
